

Mountain Supply and Service's SI-6000 is a scale and corrosion inhibitor that prevents the formation of carbonate and sulphate scales. SI-6000 is phosphorous free and contains a corrosion and scale inhibitor. The SI 6000 range improves oil and gas flow by preventing scaling, without causing any change in the crude oil characteristic. The SI-6000 range contains Nano Enhancement products that chelates dissolved minerals to prevent scale formation due to calcium carbonate and for prevention of strontium sulphate deposits.

---

### APPLICATIONS:

- Maintain scale free surfaces in pipe walls, heat exchangers and valves.
- Treat water cut well flow lines, process equipment and oil pipe lines.

---

### BENEFITS AND ADVANTAGES:

- Inhibits the formation of carbonate and sulphate scales.
- Contains a corrosion inhibitor for added value.
- Phosphorus Free.
- Environmentally friendly.
- Biodegradable in brine and fresh water chemistry.
- Protects steel and other metal from corrosion.
- Effective across a wide range of temperatures and pressures.

---

### MIXING GUIDELINES:

- Typically, low levels of scale inhibitors (20 ppm to 500 ppm) are continuously injected or batched to prevent or limit scaling of this equipment.

---

### PACKAGING:

SI 6000 is available in 5 Gallon Pails.

Read the Safety Data Sheet for complete handling information before using or storing this product.  
The SDS is available upon request or on our website at [mountainoilfield.com](http://mountainoilfield.com).
